Description :Self Refelction

As a group we worked on the statements together after class and the free work period we had in class. We did the mockups and ERD on lucidchart together. Each of us did a result to show our work. As a group we were done last week with everything. That gave us time to look over everything and ask questions about the project. This way we are not rushing to get it done at the last minute.

This semester is going really well. I talked to the learning coach and I need to give myself more time on my homework. Not rushing things and just getting it done.
